

General Instruction

Download BoilerPlate from, <https://github.com/KevinMathewTh/ISALandinPage>

Code only in the assigned units file and corresponding styles sheet

Use proper comments to help debugging and future maintenance

class naming and Id naming should have hyphens (the format eg : test-class)

bootstrap can be used

either bootstrap grid or css flexbox can be used to position elements and make it responsive

use “rem” units for font size , a px to rem converter can be found online.

Use separate style sheets for each units

stylesheets and images should be made in assets folder

do not tinker with the index.html file

do not change file names

Text me or in the group for any clarification or requirements (for example for assets)

Use assets from fontawesome for icons

Colors Used are

primary : 01303F

secondary : 6E6DFA

teritiary : D4FOFC
